- Problem solved with the students on their bugs and errors.
- Completed the Bottega Course prior to mentoring.

PROGRAMMING LANGUAGES

Python

Java

MySQL

CSS

SCSS

JavaScript

HTML

Fearless

RStudio

PROJECTS

Student Demographic (10/2019 - 12/2019)

- A peer and I worked together to create a SQL database with information about the students of Westminster College and create an "Outreach" program. We achieved this by sending out a questionnaire and sorted that data into groups where students with similar interests are capable of meeting when they never had a chance in day-to-day activities.

ORGANIZATIONS

Creative Coding Club ~ Co-founder (01/2020 - Present)

Facilitated coding workshops, company tours, QA sessions, guest speakers, resume/interview workshops, and other club activities. Personally reach out to students and faculty about meetings, and organize notifications. Grew the club from the ground up into a thriving community of Computer Science and Business students at Westminster College.

SKILLS

Self-motivated

Leadership Skills

Team Player

Open minded to new solutions

Organization Skills

Great verbal and written communication skills

Fearless

Problem Solving

Customer-Service
